Subject: Erosion Control Plan

Grading/Site Development Permit

Dear Applicant:

As the rainy season approaches, the City of Concord requires an approved erosion control plan for all sites where grading or construction may occur after October 1st, the beginning of the rainy season. Erosion control measures are also required for sites where construction has been completed but the disturbed soil has not been landscaped or otherwise protected to prevent movement of sediment off-site or into the storm drain/creek system. This is in compliance with the Countywide NPDES (National Pollutant Discharge Elimination System) Permit with the California Regional Water Quality Control Board.

If you haven't already submitted an erosion control plan, please do so as soon as possible so that it can be reviewed and field implementation can begin in a timely manner. You may call the inspector for your project if you have any questions or uncertainty about what is required.

Thank you.
